

Introduction to PROCESS: STAR Institute's Treatment Approach to Sensory Processing Disorder (2 hours)

A brief overview of STAR Institute's evidence-based treatment approach, this course exposes participants to the both the procedural requirements and therapeutic principles of this treatment approach. Participants will view treatment videos and discuss the application of the PROCESS treatment approach in sensory-based treatment. It is recommended that participants already be familiar with the SPD Nosology (Miler et al., 2007) and sensory integration/processing treatment principles before attending this course.

Learning objectives:

- Define the seven procedural requirements that support PROCESS
- Define the seven therapeutic principles of PROCESS
- Identify application of PROCESS principles when viewing PROCESS based treatment
