

SPD LEVEL 1 INTENSIVE

Mentorship

STAR Institute offers experienced clinicians the unique opportunity to learn from first generation faculty chosen and trained by Dr. Lucy Jane Miller, PhD of the STAR Institute and its premier SPD Treatment Center. Working in a small-group setting, mentees learn to apply clinical reasoning through treatment observation, analysis, and mentoring.

Benefits include:

- Learning in a small group setting, mentored by Lucy Jane Miller, Ph.D., OTR/L, Sarah A. Schoen, Ph.D., OTR/L and STAR Faculty members.
- Observation of live therapy sessions conducted by experienced STAR Institute therapists
- Networking with other experienced clinicians
- Resource materials for use in your own practice
- Competency credentials and approximately 3.2 AOTA CEUs
- First step in SPD Proficiency Certification

Topics covered in Level 1 Mentorship - Clinical Reasoning in Intervention:

- Definitions of SPD subtypes
- Differential diagnosis of SPD subtypes
- Use of standardized scales, clinical observation, and published parent/teacher report measures in assessment
- Clinical reasoning tools for treatment planning
- Application and components of the STAR Model of Intervention
- A SECRET problem-solving method for clinicians, parents and teachers

Who should attend:

This intensive program is designed for therapists to enhance diagnostic and clinical reasoning skills. Successful completion of a Level 1 Intensive Mentorship program is required to obtain SPD Pro Certification I, and apply for a Level 2 Mentorship.

Now also presented at various off-site locations!

Visit website for details.
