

# SPD LEVEL 2 INTENSIVE

The Level 2 Mentorship course, **Hands-On Advanced Treatment**, has two components: **Mentee** and **Apprentice**.

**A Level 2 Mentee must be an occupational therapist.** Mentees will work closely with STAR Institute Faculty Master Clinicians to design and lead treatment sessions each day with actual clients. Extensive opportunities for clinical reflection and collaboration with other mentees.

**Level 2 Apprentices (open to occupational therapists and other disciplines)** will also benefit from shared advanced lectures with mentees, mentee treatment observation, related clinical reasoning exercises and opportunities to reflect on the model and its application for their own practice (OT or otherwise).

## Benefits include:

- Clinical Reflective Process leading to advanced skill development
- Deeper understanding of regulation in child and self for treatment application
- Deepening of clinical reasoning process learned in Level 1
- Development of a knowledge base that can be recognized (in treatment) and communicated to parents and/or other professionals
- 1:2 ratio of STAR master clinician to mentees
- Application of concepts immediately in treatment led by mentee, supported by STAR master clinician.
- Required course for SPD Pro Certification Level 2

## Mentorship

### Who should attend:

This mentored program is designed for Level 1 mentored therapists to enhance diagnostic, relational, and clinical reasoning skills. Successful completion of a Level 1 Intensive Mentorship program is required to apply for a Level 2 Mentorship session.
